GOLDEN WHEEL

CSR-8891D-LBFT

Direct Drive, Single Needle, Needle Feed & Top / Bottom Roller Feed, Postbed Sewing Machine (With automatic undertrimming & backtacking & roller presser lifting)(Large hook)(Backtacking with power driven roller presser).

Model No.	S.P.M.
CSR-8891D-LBFT	2,500

Max.Stitch Length	Lift Of RollerPresser (Knee)
5mm	10mm

Needle System	Needle Bar Stroke
DP×5#16 (#14~#19)	42mm

Equipped with direct drive Servo motor to drive the main-shaft directly, reduced friction loss and improve the energy efficiency.

Equipped with backtacking with power driven roller presser , reverse stitch is stitch in stitch "no mismatch".

The new design of low noise backtacking devise can improve the efficiency of sewing.

Applied with 1.6 times capacity large hook, it could reduce the frequency of replacing the bobbin and improve the sewing efficiency.

- Applied with thread trimmer for short thread end, the moveable knife, fix cutter and clamping thread spring all are adjustable.
- Extended needle bar stroke, it could be adapted to various specification of thread (#80/3~#15/3 nylon thread).
- The hand wheel at the level of the middle shaft, operators can turn it easily.
- Equipped magnet sticking type LED lamp, operators can easily adjust the lighting position.
- Machine head equipped with multifunctional button1.Backtacking 2. Correction stitch (half stitch operation) 3. Safty switch.
- For sewing functional and ornamental seams preferably on concave portions of shoe uppers ,leather products,cylider workpiece,......ect..

Code Description :

R : Backtacking With Power Driven Roller Presser

: Backtacking With Non-Power Driven Roller Presser

Code Description :

D : With Direct Drive Servo Motor

T : Edge Trimming/Lining Trimming (Vertical Type)

K : Edge Trimming/Lining Trimming (Horizontal Type)

Code Description :

: Standard Hook

L : Large Hook

Code Description :

B : Automatic Backtacking

F : Automatic Roller Presser Lifting

T : Automatic Undertrimming

FT : Automatic Undertrimming & Automatic Roller Presser Lifting

BT : Automatic Undertrimming & Automatic Backtacking

BFT : Automatic Undertrimming & Automatic Backtacking & Automatic Roller Presser Lifting

CSR-8891D-LBFT

■ CSR-8891D-HBFT
Suitable for thick thread and heavy material stitching, Needle system DPx17, The other special features are as CSA-8891D-BFT.

CSRS-8891AD-BFT

Overseas patents obtained.
Any imitation copies will be accused.

■ CSRS-8891D-LBFT
Applied with new design thread end trimming mechanism of upper thread. the length of upper thread end is less than 2mm,no need second time to cut thread end,effectively improve the production efficiency. The other special features are as CSR-8891D-LBFT.

■ CSRS-8891AD-BFT
Direct Drive, Integrated type。
(The other features are as same as above machines.)
