插孔式鞋眼织带机

INSERT-IN TYPE SHOE EYE WEBBING MACHINE

传统工艺需要经过剪切织带、鞋面切孔，人工送织带，人工车缝等至少4道工序，3-4个人工。

此设备可将4道工序全部在一台设备上完成，实现自动剪切，自动切孔，自动穿织带，自动车缝。

可大大提升生产效率，节省70%人工成本，且成品标准，有效避免人工车缝难免的误差。

Traditional working process including cutting the webbing, punching the eyelet, feeding the webbing by hand, then sewing, need at least 3-4 workers.

Use this machine can finish all the work process by automatic cutting, punching, feeding and sewing.

It can improve the productivity and save around 70% labor cost, the standard finished product avoid the difference which could happen by manual sewing machine.
